Re: Appian Paver Systems

To Whom it May Concern:

This letter serves as notice that Appian Paver Systems, formerly Stonescape Pavers, Inc., is a customer in good standing with Pavestone Co.

Year in, and year out, Stonescape Pavers/Appian Paver Systems is consistently one of the five highest volume commercial customers that we have. Doug Anthony and his staff have demonstrated their commitment to a professional organization time and time again. In fact, Doug's advertising campaign says it best; "Our Reputation is set in Stone". Stonescapes has installed over two million square feet of pavers in the Las Vegas valley, Northern Utah, and Northern Nevada over the last 8 years, and has established a long list of satisfied customers.

The Interlocking Concrete Paver market is growing at a tremendous pace. In support of this trend, Pavestone Co. built a new manufacturing facility in Las Vegas that is capable of producing 21 million square feet of pavers per year. In partnership with ICPI certified installers such as Appian Paver Systems, Pavestone Co intends to build on previous success, and continue to expand the Utah paver market. Pavers are uniquely qualified to meet the harsh freeze/thaw environment of the Utah landscape. Our pavers are manufactured to strict ASTM requirements set forth to ensure a quality job no matter how harsh the environment.

As the market expands many of our commercial installers are expanding their businesses to keep up with demand. As Doug remains on the forefront of the industry, I am happy to see him and his company grow and excel.

Please contact me should you require any additional information.

Sincerely,

Fred Byars
 General Manager
